

DiceCoin (DICE) Whitepaper

1. Introduction

DiceCoin (DICE) is a utility token built on the high-performance **Solana blockchain**, serving as the core currency of an innovative, cross-platform dice game inspired by the popular game of chance known as "Tài Xỉu." Designed for both entertainment and token utility, DICE enables players to bet, earn, and trade seamlessly within the DiceCoin ecosystem.

2. Vision

Our vision is to revolutionize decentralized gaming by building a secure, scalable, and rewarding platform that leverages the speed of Solana and the power of community-driven game finance (**GameFi**).

We aim to position **DiceCoin** as a globally recognized gaming token — combining competitive gameplay, provably fair mechanics, and a sustainable economic model.

3. Use Cases

-  **In-Game Betting**
Use DICE tokens to place bets in our dice-based blockchain game.
-  **Rewards & Incentives**
Earn tokens through achievements, tournaments, and leaderboard rankings.
-  **In-Game Purchases**
Buy NFT-based items, skins, boosts, and access passes.
-  **Trading**
DICE can be traded on DEXs (e.g., Raydium) and will be listed on major centralized exchanges (CEXs).
-  **Governance (Future)**
Token holders will be able to vote on game development decisions via DAO integration.
